Unit round-up

5 Choose the best answer (A, B or C) to fill each gap.

When should I call the doctor?

We all suffer from (1) _____ and pains sometimes, but how do we know if it's serious enough to call the doctor? Well, if you (2) _____ down with a cold or flu, you should be careful. Drink lots of water and (3) _____ a cool bath if you have a fever. You should eat, but not too much. If it's bad, a day or two in bed might be a good idea, but you should get (4) _____ it by day three. Call the doctor if it continues or if you can't stop (5) _____. You should also call the doctor if you think you are going to (6) _____ out. These could be signs that you have a/an (7) _____, which can be serious if you don't do anything about it. In that case, you might need to (8) _____ medicine.

- | | | |
|------------------|-------------|-------------|
